

# SHIMAL'E PELEG

## Crystal/Tulip

Assembly instructions

### In the box:

The glass pendants already attached to the ceiling canopy

Glove (in the black box - please use them while installing the canopy to the bracket)

Spare glasses (please keep them in a safe place)

Spare bulbs

Spare screws

 **Turn off the correct electrical switch ! before you begin the installation !**

**1. Please open the box and take the fixture out leaving the glasses wrapped**

**2. Remove the metal bracket from the back of the canopy.**

**3. Prepare screws according to the type of ceiling:**

**For wood ceilings** please use screws for wood.

**For drywall ceilings**, make sure you put screws where the ceiling joists are and use screws long enough to reach the hard layer on top of the drywall.

**For concrete** use masonry anchor screws to hold the fixture

**4. Screw the metal bracket to the ceiling with the flat side facing up.**

The earth wire should come out of your electrical box – attach it to the screw on the bracket

**5. For the next stage please use the gloves supplied in the black box, in order to prevent fingerprints on the canopy.**

**Make sure that the electrical wires are exposed near the bracket.**

**Lift the main canopy and screw it to the bracket** using the existing holes at the edge of the bracket.

**You will need a second person to help you hold the fixture up** while you connect the electrical wire to the fixture.

**In case the ceiling is not 100% flat, the installer should** use white or clear silicone to close the gap between the ceiling and the canopy.

**If you have the double canopy solution do the same process with the upper canopy and then with the lower canopy.**

**6. Once the canopy is installed, untie the wires, gently stretch them down - go few times on each wire.**

**7. Please remove the wrap from the glasses.**

**8. If you need to adjust the length, each cord is being held by a 'naked terminal'. Use a plier to gently open it, adjust the length and then gently press it again to hold the cord. Please be very gentle not to break it.**

**ENJOY!**
